CUSTOMISED SUPREME OPTIONS

SUPREME VENTUS®

Looking for zero-emissions? Having a vessel with a varying draught? The Supreme Ventus ensures zero-emissions of oil through a sophisticated air system and features a Condition Monitoring function.

SUPREME ATHMOS®

Do you have a vessel with a limited draught and looking for zero-emissions of oil? The Supreme Athmos prevents oil leaking into the environment and features a Condition Monitoring function.

SUPREME OIL COLLECTOR RING (Q)

Do you prefer a clean engine room if wear occurs? The Oil Collector Ring prevents oil droplets from the forward seal entering the engine room.

WIRE WINDERS

Do you want to avoid fishing lines from damaging the seals? Use our wire winders which can be mounted on the propeller hub.

NET CUTTERS

Need to protect your seal from damage caused by fishing nets? Choose stainless steel net cutters fitted on the rope guard.

CATHODIC PROTECTION (P)

Choose extra anodes to deliver improved corrosion protection on your liner.

FKM LIP SEALS (N)

What is your speed and draught? Depending on your operating conditions we recommend to use FKM lip seals instead of NBR.

FKM EAL LIP SEALS

Are you using an Environmentally Acceptable Lubricant (EAL) instead of mineral oil? Our new lip seal has an especially developed FKM lip seal compound which ensures more durability when using EALs.

DIRT BARRIER (L)

Would you like to avoid damage to the aft seal caused by sand and debris? Choose a dirt barrier which also prevents small fishing lines from entering the seal.

DISTANCE RING (D)

Looking for a way to extend the lifetime of your chrome steel liner? A divisible distance ring can be added to your Supreme seal. By removing the distance ring during maintenance, the entire seal can be repositioned to create a new running surface for your lip seals.

HASTELLOY® C4 SPRINGS

Looking for lip seal springs that are more resistant to corrosion? Use our lip seals with Hastelloy® lip seal springs.

HML LINER COATING (C)

Looking for a way to lengthen the lifetime of your whole seal? A liner with a special hard metal layer (HML) enables:

- An improved liner lifetime.
- Good effective heat transfer, preventing hardening and ageing of the rubber lip seals.
- Decrease docking time and saving costs by not having to machine the liner.
